Practices & Collaboration

- Agile, Scrum
- JIRA
- Team Leadership
- Mentoring & Code Review
- Client Requirements Gathering

AI & Emerging Tech

- Prompt Engineering
- AI Skill Creation
- AI Agent Creation

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer | B-WYZ

Lahore, Pakistan | September 2023 - Present

- Design and develop full stack web applications using PHP, Laravel, React.js, and Next.js, delivering scalable and maintainable solutions.
- Build and integrate RESTful APIs supporting front end applications and third party service connections.
- Collaborate directly with international clients to gather requirements, propose technical solutions, and ensure on time delivery.
- Write clean, well documented code following industry best practices and participate actively in code reviews.
- Manage database architecture and query optimization using MySQL and Redis.

Senior Software Engineer (PHP / Laravel) | Vaival Technology

Lahore, Pakistan | August 2022 - September 2023

- Led a team of engineers delivering high quality, scalable web applications for global clients across multiple industries.
- Mentored a cross functional development team, conducted code reviews, and enforced adherence to best practices.
- Developed back end systems in PHP and Laravel with a focus on performance, scalability, and clean architecture.
- Managed multiple concurrent client projects from requirements gathering through deployment, consistently delivering on schedule.
- Partnered with product managers and international clients to translate business requirements into technical solutions.
- Implemented and maintained RESTful APIs, Redis caching layers, and complex MySQL database schemas.
- Drove adoption of Agile and Scrum practices across the team, improving delivery predictability and team velocity.

Senior Software Engineer (Laravel) | Red Signal

Lahore, Pakistan | January 2021 - August 2022

- Owned the full development lifecycle for multiple concurrent client projects while informally leading a small development team.
- Developed and maintained complex PHP, Laravel, and CodeIgniter web applications for a diverse international client base.
- Reviewed team code and provided technical guidance to junior developers, improving overall code quality.
- Collaborated cross functionally with designers and QA engineers in an Agile environment.

Software Engineer | TechLeadz

Lahore, Pakistan | November 2016 - January 2020

- Progressed from Associate Web Developer to Senior Software Engineer over 3+ years, taking on increasing ownership of projects, clients, and team members.
- Developed a wide range of web applications using PHP, CodeIgniter, and Laravel, building a deep full stack foundation.
- Built and launched multiple production applications, including JARO, a mobile connected game platform published on Google Play Store and Apple App Store using jQuery Mobile.
- Contributed to front end development with HTML, CSS, JavaScript, and jQuery.
- Worked closely with clients to understand requirements and deliver solutions aligned with their business goals.

KEY PROJECTS

Wiim AI - Real Estate Investment Platform (wiim.ai)

- Built scalable features for an AI driven real estate platform enabling automated deal sourcing and investment analysis.
- Designed systems for processing large scale property data and generating actionable insights.
- Improved decision making workflows using AI based recommendations and market analytics.

Go Fusion - Sustainability and Carbon Footprint Platform (gofusion.fr)

- Developed features on a platform promoting eco friendly behavior through gamification and rewards.
- Built systems enabling users to track, reduce, and improve their environmental impact.
- Supported engagement of users, companies, and communities in green initiatives.

Care Cart - Abandoned Cart Recovery App (apps.shopify.com/partners/care-cart)

- Developed a Shopify app that automates abandoned cart recovery through email, push notifications, and popups.
- Implemented customer retargeting, campaign automation, and sales optimization features.
- Built tracking tools to analyze user behavior and improve conversion rates for e-commerce stores.

The Remarkable Practice - Healthcare Consulting Platform (theremarkablepractice.com)

- Contributed to a platform providing training, systems, and tools that help chiropractic clinics grow and manage their business.
- Built features supporting patient acquisition, marketing strategy, and practice optimization.
- Delivered solutions improving operational efficiency, team performance, and long term business growth.

EDUCATION

BS Computer Science

COMSATS Institute of Information Technology, Islamabad, Pakistan | September 2012 - May 2016
